technical skills

languages & frameworks Python, Golang, Scala, Haskell, Java, C/C++, React/TypeScript, SQL, Django, K8s, Spark, Kafka, Airflow, Presto, Terraform, Bazel, NixOS, PyTorch/TF/JAX, NLTK, SciPy, Pandas, OpenCV

work experience

05/2025 – Present Anduril Industries Costa Mesa, CA

Software Engineer, Air Dominance & Strike
(Role details available upon request – active projects under U.S. government contracts)

07/2024 – 02/2025 Tesla Palo Alto, CA

Autopilot Software Engineer (AI Tooling)

- Overhauled development system for internal clip visualization tool
- Built pre-caching system to improve load time of autopilot clip visualizations
- Improved system infra, monitoring & oncall processes, and code quality

2019 – 2024 Robinhood Menlo Park, CA
Software Engineer & Tech Lead (Backend & Data, Experimentation Platform)

- Architected Experimentation service to use asynchronous data propagation for better reliability; improved resource efficiency (\$\$\$) by 8× and enabled offline experimentation by rewriting in Golang
- Developed flexible rule-based filtering system for safer, gradual rollout of Dynamic Config updates; led eng-wide migration
- Built and maintained data pipelines for Experimentation (new features, GDPR compliance, schema standardization, etc.)

Summer 2019 Uber A.T.G. Pittsburgh, PA
Software Engineering Intern (Motion Planning for Self-Driving)

- Worked on data pipelines to validate geometrically-constrained SDV behavior

Summer 2018 Uber Inc. Palo Alto, CA
Software Engineering Intern (Maps)

- Developed Spark pipelines to generate vector tilesets
- Automated map generation from GPS traces using Hidden Markov Models

2016 Viabot (viabot.co) Palo Alto, CA
Software Engineer

- Designed and programmed electrical system for prototype outdoor robot

Summer 2014 Declara, Inc. Palo Alto, CA
Data Science Intern

- Developed text-tagging system using Python, text-retrieval, ML, and NLP techniques

projects

2019–2020 TensorFlow Keras for Java github.com/dhruvrajan/tensorflow-keras-java
High-level training API on TensorFlow Java, modeled after tf.keras

2018–2019 UTCS TAUR NLP Group Austin, TX

Applied NLP & Deep Learning to brain-cancer diagnosis models supervised by radiology reports

2017 Probabilistic Programming in Haskell

github.com/dhruvrajan/probabilistic-haskell

2013–2016 GRTPyFramework (FIRST Robotics Team 192)

Palo Alto, CA

Developed robotics control system in Python; won Innovation in Control Award (2016)

education

2016–2019 The University of Texas at Austin

B.S. Computer Science, Turing Scholar

2012–2016 Henry M. Gunn High School

Palo Alto, CA

interests

compute infrastructure • functional programming • machine learning • natural language grounding
• probabilistic programming
